

LIFELINE BATTERIES

WHAT ARE LIFELINE BATTERIES

Lifeline™ Batteries have earned global recognition as the premium AGM battery technology meeting the rigorous demands of a wide range of applications. Lifeline™ Batteries have been designed for excellent all-round performance and extended cycle life making them ideal for all service load and starting requirements in yachts and commercial craft. They have a proven performance record in emergency services, military and recreational vehicles globally, offering market leading life expectancy.

APPLICATIONS

- Marine
- Emergency Services
- Defence Installations
- Renewable Power
- Offshore
- Uninterruptible Power Supplies
- Material Handling Equipment

BENEFITS

- Absorbed Glass Mat (AGM) Construction – Maintenance Free, Non-Spillable
- 1,000 Cycles @ 50% Depth of Discharge
- -40 to +71°C Operating Temperature Range
- Proven Reliability - Used By The US Military
- Very Low Self Discharge Rate
- Fast Recharge
- 5 Year Pro-Rata Warranty for Marine Applications

SPECIFICATIONS

	Voltage	Capacity @ 20hr Rate	CCA at 68°F/20°C	Reserve Capacity @ 25A (mins)	Dimensions (mm)				Weight (kg)	Terminals (pos / neg)
					Length	Width	**Max. Height	Height over Terminals		
GPL-1400T*	12	43Ah	850A	-	248	127	174	174	14.5	M8F / M8F
GPL-24T	12	80Ah	800A	149	283	168	235	235	25.5	M10F / M8F
GPL-27T	12	100Ah	845A	186	306	168	222	241	28.1	M10F / M8F
