

# ACCESSORIES FOR ENGINE START PACKS

## WHAT ARE OUR POWER ENGINE START PACKS

Our Red Flash portable engine start packs are known around the world for their high quality and reliability. With professional batteries and cases, it is important to have the very best quality cables, connectors, chargers and other ancillary items. Made to meet our high standards, we ensure that every aspect of your equipment is robust and lasts a long time.

## TROLLEYS

Our packs are designed to be man-portable with integrated carry handles. To help with manoeuvring and stowing around the workshop, we have a range of trolleys to suit all of our large vehicle starting packs.

## LEADS

- NATO Codified for use with military equipment
- High grade welding cables for full performance use in extreme environments
- Crocodile Clip/Clamp leads made specially to our specification for maximum electrical contact and maximum insulation
- Rugged for long life and durability

## CHARGERS

DMS uses a wide range of specialist chargers for all of our power products. Our intelligent 3 stage chargers are designed to be connected to the pack safely with no monitoring required.
